

FLEXFUSION “WHAT TO EXPECT”

The H&P FlexFusion package comes with industry leading drilling technology and a robust support network. FlexFusion is a pre-configured package that includes all the essential technologies needed to automate the process of drilling a stand. This makes it a seamless process for operators to quickly get started in leveraging the enhanced performance that automation provides. Here is an overview of what to expect when deploying our FlexFusion technology package:

Onboarding

Onboarding is what we call the Transfer of Trust. The primary purpose of onboarding is to ensure a smooth and positive experience as you begin your journey with FlexFusion. Your Account Manager will set a preliminary meeting to introduce all internal and external office and field support teams. In the preliminary meeting we will discuss the following:

- Define what success looks like to you.
- Discuss and agree upon technology goals and set expectations for tracking and monitoring performance.
- Review our standard deployment process.
- Gather necessary data and/or inputs from you.

In The Field:

- Enable the technology and provide certified training to our drillers, Rig Managers and Well Site Managers by our in-field experts.
- Capture deployment feedback and generate a health score.

Initial Execution- First 30 days

FlexFusion will be supported by exceptional service and qualified individuals. We will be proactive in our efforts to provide best in class execution and operational support. We will provide:

- Enhanced performance monitoring by our Drilling Performance team for the first 30 days of execution.
- Remote support teams will be available 24/7 to answer any questions you may have
- Frequent Success checks and feedback loops with field and office stakeholders
- Goals focused review at the completion of the initial execution phase

Perform- After 30 days

After the first 30 days we will continue to provide best in class execution and operational support

- Exception based monitoring and field support.
- Performance reporting based on your feedback and expectations.
- Continued success checks coupled with deployment feedback loops.
- Provide training to new rig crew members that may rotate in.
- Technology development reviews to meet future product needs.

For more information on how Helmerich & Payne can help you achieve better drilling outcomes, contact an H&P sales representative today or contact us through our website at helmerichpayne.com/contact.

It's time to follow through on your drilling performance potential.

Past performance is not a guarantee of future results. Any statements regarding past performance are not guarantees of future performance and actual results may differ materially.
